

SUPPLEMENTAL EYEWASHES include bottled eyewash and other devices that do not meet 15-minute drench criteria.

These supplemental solutions are designed to treat nuisance hazards and/or as an initial first aid to injured workers during the path to certified eyewash, but they do not meet the 15 minute drench criteria of the ANSI standard Z358.1. Bottled eyewash is designed to be positioned close to the point of need. Acceptable for immediate first-aid, bottled eyewashes should support, but not substitute, a primary eyewash or shower unit.

Saline Eyewash Bottles

- Contains a buffered saline solution that is sterile and superior to tap water for emergency eye care
- Blow-Fill-Seal (BFS) bottle is tamper resistant, and maintains the sterility and integrity of the eyewash
- Easy to remove and open in emergency situations
- 1, 4, and 8 oz. bottles have user controlled delivery, delivering drops or an irrigating stream of solution, depending on the squeeze pressure applied to the bottle
- Trilingual instructions (English, French and Spanish)
- Does not meet ANSI standard Z358.1 15-minute flushing requirement

Honeywell

Model No.	Mfg. No.	Cap. Oz.	Price /Each
