Stair Gauge Fixture Attachments for Rafter & Framing Squares

NO. 111 (LONG)

A pair of these fixtures clamped to a carpenter's framing or rafter square forms a handy gauge for laying out stair stringers, hip, valley, and other rafter cuts plus many other unusual cuts.

- Furnished in pairs - one right hand and one left hand
- Nickel plated cast iron is tough and rust resistant
- Ends are machined square for true work contact and alignment with square blade graduations
- Brass clamp screw to prevent marring the blade

Priced per Pair

Model No.	EDP No.	Width Across Flats"	Width Slot"	Price /Each
HU965	50476	1 7/8	3/16	

NO. 470 (SHORT)

These stair gauge fixtures are similar to our HU965, except they have a smaller area that contacts the square blade. They are a convenient, small size and are lower in cost.

- Nickel plated hexagonal steel for strength and resistance to rust
- Brass clamp screw to prevent marring the blade
- Slotted to keep two opposite hexagonal faces at right angles to the edge of the square for true work contact and positive alignment with graduations

Priced per Pair
