## Deluxe Rollers

Move massive machines and equipment with minimum effort and maximum safety right on ordinary concrete floors.

- Operate with a continuous chain of linked rolls recirculating around a hardened steel load plate
- Rigid rollers suggested for straight line moves
- Swivel rollers suggested for turns in tight quarters
- Swivel lock combines swivel and rigid designs with spring-loaded locks that can engage every 45°
- Diamond steel is best for moving crated or palletized equipment
- No slip padded tops are ideal for metal based machines, or for moving equipment on less than perfect floor surfaces
