

Compact Air Series 200 Powered Air Purifying Respirators (PAPR)

- Triple alarm system creates an audible, vibratory, and visual alarm to warn workers of battery life and/or clog
- Vibratory alarm can be felt even through jackets; warns workers who are hearing impaired or in high noise environments
- Two visual alarms: one for low battery and a separate one for a clogged filter; workers will know the alarm reason and maintain the PAPR accordingly
- Lightweight for improved comfort and longer wear
- The same unit can be used for either tight fitting facepieces or loose fitting hoods to accommodate different needs and preferences
- Airflow is automatically adjusted to meet OSHA and CSA CFM requirements
- Complete assemblies include motor blower, battery assembly, back pad and belt (breathing tube, head gear, and cartridges sold separately)
