

Classes of Fire:

Fires are classified according to the material that is burning. Fire extinguishers are rated by the area each will cover for a particular class of fire. The higher the number, the bigger the fire area you can fight.

Note: Maintenance and recharging of all fire extinguishers should be performed by a qualified service company.

CLASS A fires are the most common. They involve ordinary combustibles such as wood, paper, cloth, rubber, a number of plastics, and other ordinary materials.

CLASS B fires are caused by gasoline, grease, oil, paint and other flammable liquids. Commonly strikes in warehouses and manufacturing plants.

CLASS C for live electrical equipment. Often occurs in computers, monitors, wiring and appliances.

Dry Chemical ABC Fire Extinguishers

- Steel cylinder complete with cylinder skirt
- Industrial-strength cylinder has high corrosion and impact-resistant polyester powder paint finish
- Waterproof stainless steel gauge
- Anodised aluminum valve
- Strong polyester powder-coated steel handles
- Completely rechargeable
- Full hand grip for ease of operation
- UL/ULC listed

Aluminum Cylinder Carbon Dioxide (CO₂) Fire Extinguishers

- Well suited for corrosive environments
- Industrial-strength aluminum cylinder is up to 30% lighter than steel
- Stainless steel hose band
- Strong impact-resistant horn
- Bar-coded label
- Easy to service
- Comes with wall hook
- ULC listed

K Class Wet Chemical Extinguishers

- Brass valve construction
- Specially designed and tested to address fires in restaurants and commercial fryers
- Very effective on cooking oil and grease fires
- Ideal for restaurants, kitchens, cafeterias, food courts, and other locations with high temperature cooking materials
- Nozzle designed to prevent splashing
- Designed to be used in conjunction with a kitchen suppression system
